INTEGRATED
CLAY ROOFING
SYSTEM

1. **VAPOUR RERMEABLE WATERPROOFING MEMBRANE**
2. **XPS**
3. **CLAY ROOF TILE**
4. **RIDGE TILE SEALING TAPE**
5. **RIDGE TILE**
6. **RIDGE TILE METAL CLIPS**
7. **CLAY ROOF ACCESORIES**
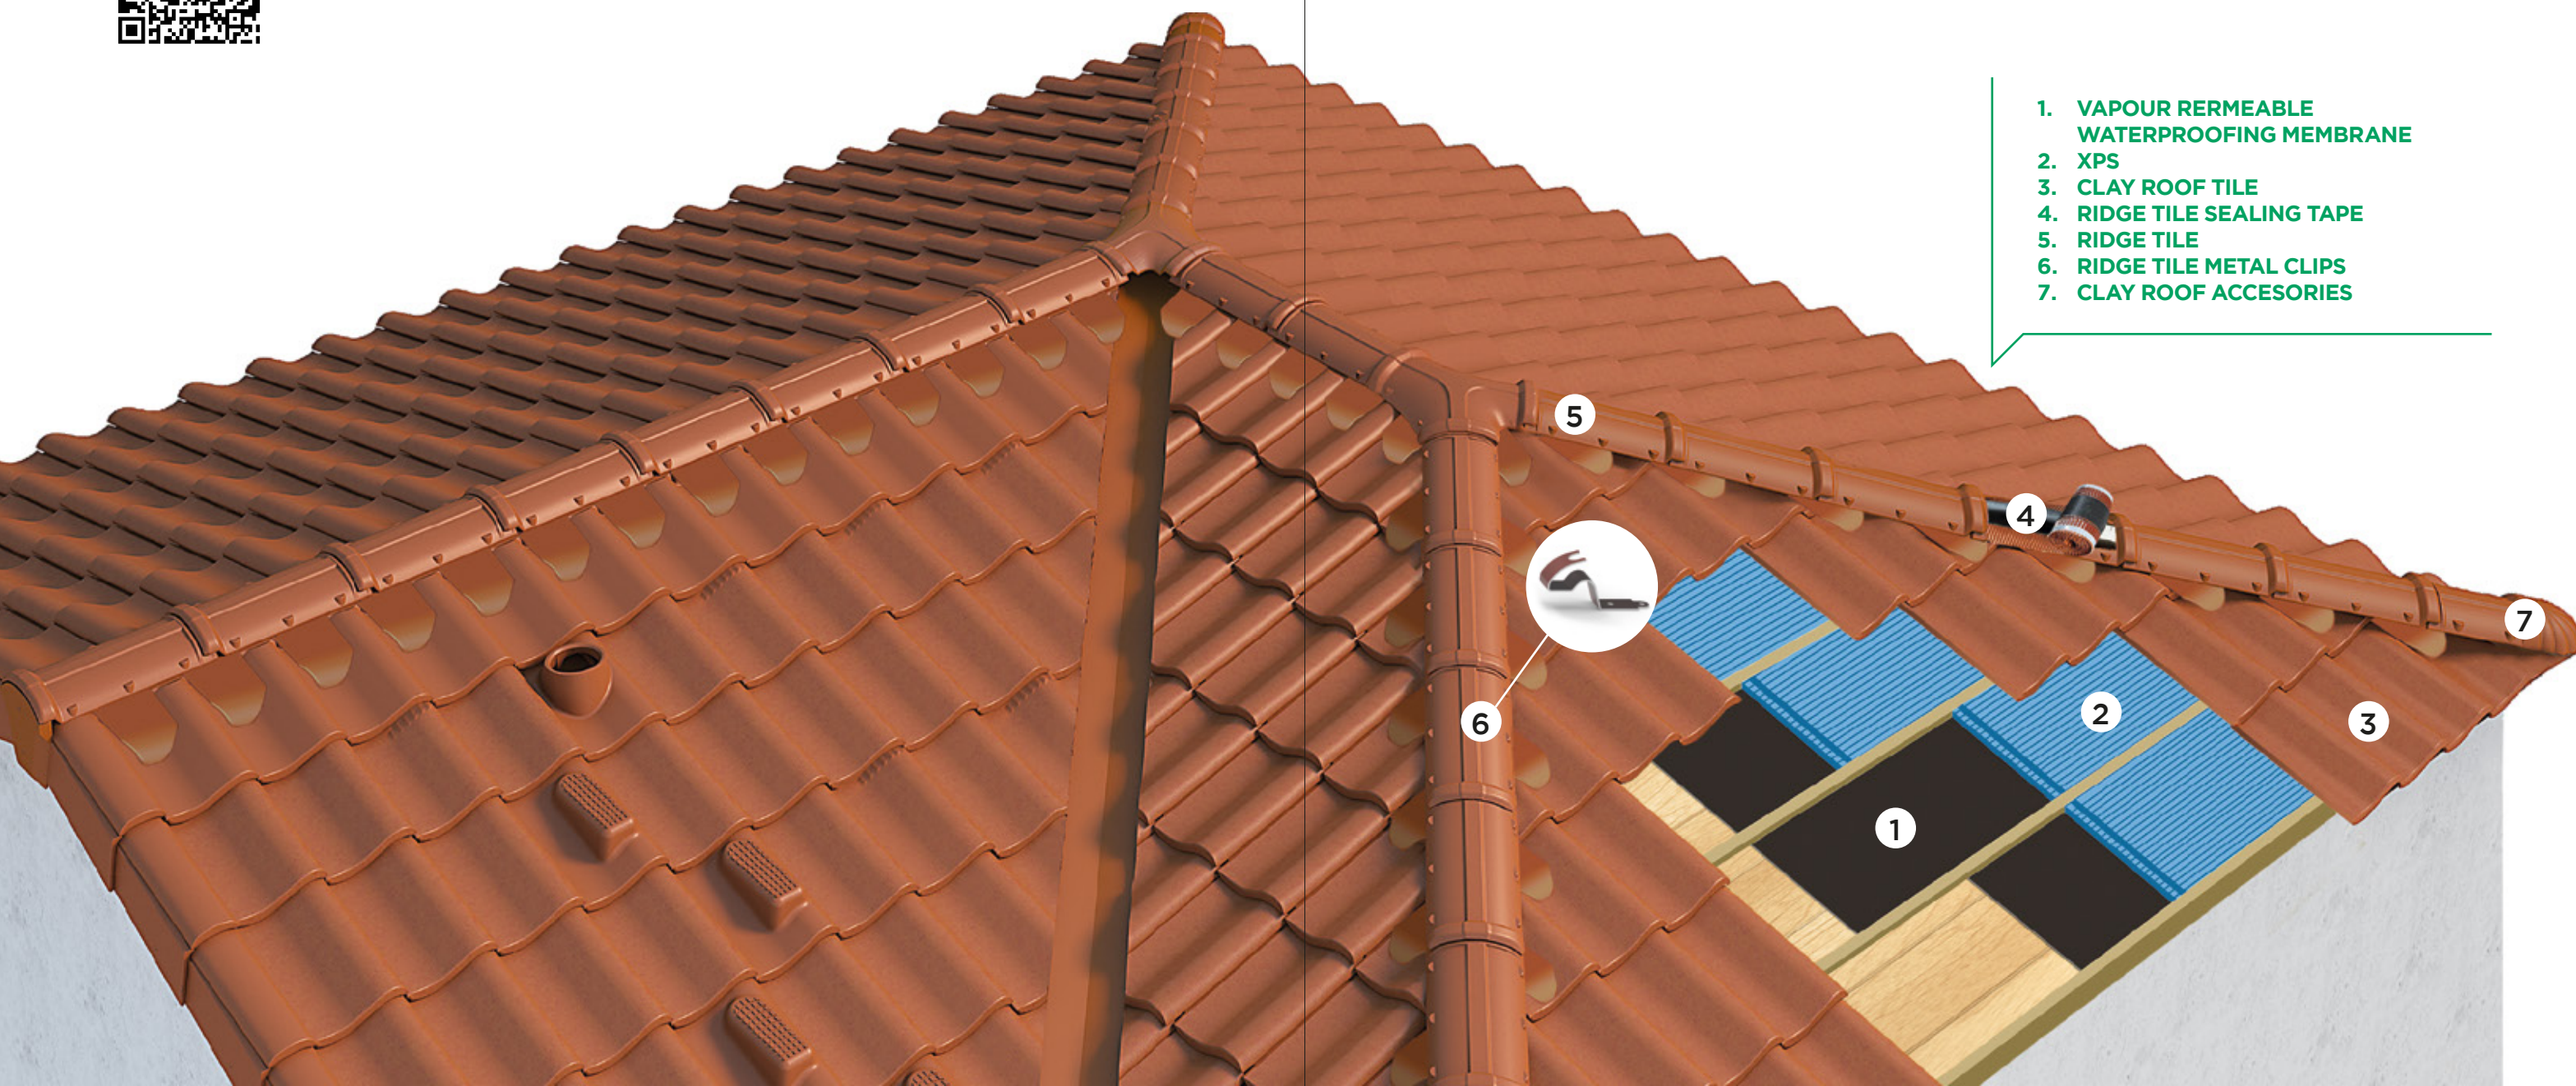

VAPOUR-PERMEABLE MEMBRANES

- Pre-covering layer under the external roofing
- Completely waterproof
- Protects the thermal insulation layer against precipitation and the wooden elements against corrosion
- Can be used on both ventilated and non-ventilated roofs

KEBE 135
3-layer Vapour Permeable Membrane

Waterproofing membrane characterized by **high vapour permeability.**

KEBE 170
4-layer Vapour Permeable Membrane

Waterproofing membrane characterized by **high vapour permeability** and **high resistance** to mechanical damage.

KEBE 220
4-layer Vapour Permeable Membrane with **two adhesive strips**

4-layer tile roofing waterproofing membrane, with double adhesive tape for easy and quick installation, as well as for sealing of the overlaps.

Thanks to the use of **Double Fiber Technology (DFT)** in the production process, the membrane achieves **very high resistance to weather conditions and damage during assembly.**

It is used in roof constructions with the possibility of installing solar panels.
